PROFESSIONAL EXPERIENCE

Clasier Publishing

Lead, Brand & Products | Mar 2024–Present · Remote

- Designed and built clasier.pub from Figma layouts through Next.js implementation and deployment on a Docker-based VPS.
- Lead UX and brand direction across four connected publishing, ecommerce and internal platforms under development.
- Define reusable interface patterns and workflows for storefronts, payments and publishing tools, maintaining consistency across products.
- Create campaign and brand materials across digital and print, including brochures, banners and business collateral.

The Big Break Moment Africa

Lead Graphic Designer | Mar 2022–2024 · Part-time / Contract

- Produced digital and print campaign assets for a 300-hour reality experience project serving an Africa-wide audience.
- Managed visual design from the initial brief through final production and delivery.

SageWorks Publishing

WordPress & Creative Designer | Jan 2020–2022 · Remote

- Built and maintained WordPress websites for publishing clients, with responsive layouts and consistent visual presentation.
- Designed book layouts and visual communications for publishing projects.

SKILLS

Product & UX design
User flows & prototyping
Design systems
Brand identity
Visual communication

DEVELOPMENT

React / Vite · Next.js
WordPress / Elementor
Framer
Headless CMS integration
Responsive web design

TOOLS

Figma · Photoshop
Illustrator · GitHub
Claude · Codex

SELECTED PROJECTS

Lune — Hiring platform

Product Design & Front-End | Figma · React / Vite · Vercel

- Designed the waitlist, marketing site and product UI for a skills-verification hiring platform.
- Created Skill Passport, skill-gap analysis, assessment dashboard and employer candidate views within a shared design system.
- Implemented the front end in React / Vite and deployed it on Vercel, connecting the marketing and product experiences.

dosujr.com/project/lune-platform

Athena Centre — Headless website & CMS

Full-Stack Development | Next.js · WordPress REST API · cPanel

- Rebuilt a policy and research institution's website with a custom Next.js front end, retaining WordPress for editorial content.
- Developed editorial dashboard tools for analytics, moderation and team controls, alongside member-account functionality.
- Connected newsletter sign-ups to Zoho Campaigns with a Google Sheets backup, and deployed the front end and CMS separately.
